

# QM Quick Measure Laser Distance Meters

The QM Quick Measure laser distance meters are the first family of distance meters designed specifically for the tough construction site environment.

The housing are made of durable engineered plastic with extensive use of protective rubber overmold. The electronics have been cleverly isolated resulting in a product that survives a drop and the typical rough conditions found on jobsites.

# QM Quick Measure Models

Simply Press and Measure - Quick and Accurate

Safely Measure Hard-to-reach Places

Rugged Construction - Designed to be Dropped

## QM55

### Key Features

#### Area and volume functions

- Easy quick calculations of common tasks

#### Pythagoras functions

- Provides indirect height or width for inaccessible areas

#### Signal strength indicator

- Quickly determine measurement conditions

## QM75

### Key Features

#### Small and compact

- Fits in your pocket; easy to carry and transport

#### Simple to operate

- Press a single button and measure

#### Indoor and Outdoor

- Versatile, use anywhere

## QM95

### Key Features

#### High accuracy

- $\pm 1.0$  mm ( $\pm 1/24$  inch) accuracy for precise work

#### Long range measurements

- 200 m (650 feet) range

#### Large LCD

- Easy to see in all conditions, indoor and outdoor

### All Quick Measure Models Feature:

#### Tough and rugged

- Stands up to tough jobsite conditions

#### Designed for construction

- Drop specification of 1.5 meter (5 feet)

#### Quick

- Fast measure response time

#### Accurate

- Accuracy is maintained over the entire measure distance

#### Sealed against dust and water

- If it gets dirty, simply wash off

#### Illuminated display

- Easy reading in low light conditions

#### Long battery life

- Standard alkaline batteries provide thousands of shots

#### Selectable units of measure

- Quickly select the units required

#### 3 Year Warranty

- With the first 2 years at no cost
